

MARITIME SERVICES SHIP VETTING

MMS Ship Vetting provides risk assessment services in ensuring a high quality and safety standards on vessels and bringing values to charterers, ship operators, and terminal operators.

The report will indicate whether vessels are well managed and maintained and to help charterers in making better vetting decisions, leading to improvements in the quality and safety of vessels and minimizing risk to environment.

mms
Vessel Inspection System

- Risk Management services to ensure that only safe and efficient vessels are chartered
- Provide charterers and ship owner/operator with access to a vetting system to verify the status of vessel intended for use (VIS)
- Provide active intervention and solutions to address concerns when any deviation arises
- Responsible and accountable to ensure all vessels nominated to call at Clients' terminals are positively vetted

What We Offer

- Reduce the risk of exposure from incidents and mechanical breakdowns of the chartered vessels
- Provide assurance to the Charterers / Terminals that the vessels are safe for operation
